Description

AKs

- Add slider behavior only when more items are available than would be displayed
  - Explorer
  - same for Bühne on https://bsi-lagebericht.de/
  - maybe others?

Links

- Stage:

Slider-Verhalten bei zu wenigen Elementen.

Betrifft auch die Startseite, wo der Opener jetzt endlos slidebar ist: https://bsi-lagebericht.de/

Comment by Bentley, Julia (init) [09.11.2026 - Visible by: Intern]

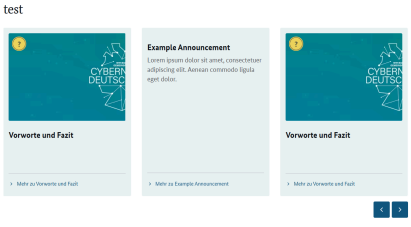

I think there might be a frontend issue with the `content - explorer` paragraph.

If you only have one item in the explorer you get the following:

It repeats the same value multiple times and presents the previous and next buttons but they do not work.

If you have 2 or more items then the previous and next buttons start working again but they just cycle through them. This is not an issue for 3 or more but it looks odd if you only have 2 node references as it clearly shows the content repeated:

In my point of view I would expect the next and previous buttons to not be rendered unless the editor has added at least 4 node references.

Again, these might not be considered issues for BSI as it might not happen if the paragraph is used as intended but just flagging it to be sure all is ok as if they add less than 3 node references the paragraph looks "odd" to me.
